

Highway Report

We have spent most of our time getting our paving projects ready to pave. Cutting ditches and shoulders and hauling stone and gravel.

We have also been helping Dekalb and Fowler with their paving projects. They will be helping us for the next few weeks with our paving projects. We also have been mowing roadsides. We are about 80% done with our first pass and should have all roads mowed before the 4th of July shutdown. Edwards, Fine, Dekalb, Fowler and Hermon will all be trucking asphalt for us on our shared service agreement. This is a huge savings for us on trucking. That gives us about 16-18 trucks hauling asphalt for our paving projects.

Suite-Kote started paving Hill Road today with binder and hope to be done tomorrow.

The County Paving Crew should be here next week to pave Lazy River Road and Dutton Road. Hill Road has to cure for a 21 day minimum and then we can top it with Type 6 Hot Mix with the County Paving Crew.

We have received a check from FEMA for \$9,906.75. It is a good start; we are still working on getting a substantial amount more as we file more paperwork. The next FEMA project reimbursement should be close to \$100,000.00. I would like to thank Darcie for all her help with the FEMA projects paperwork.

I would like to thank the men for another safe and productive month.
