

Highway Report

7/15/25

We have been busy with our paving projects. Lazy River Road and Dutton Road are completely paved, and we are hauling gravel this week for shoulders on these two roads.

Hill Road is reprofiled with 3" crushed stone and the first course of asphalt is done. We will be topping Hill Road in the next 3-4 weeks with type 6 hot mix asphalt.

We have also regraded and put calcium chloride on most of our dirt roads; we should have them all done by tomorrow. We have also been mowing roadsides for the second time this year. We have 3 kids from the youth program through the One Stop Career Center. They are doing a good job helping with painting and cleaning up around the Town Barn. They also have been helping with the weed eating and mowing the Town cemeteries.

I would like to thank the men for another safe and productive month.

Rich Meilleur
Highway Superintendent
