

Highway Report

9/16/2025

We have completed putting shoulders on our paving projects. We put shoulders back up on spots that needed it on several roads. We have also been screening sand for winter. We have been cutting brush on Fordham Hill Road, Blanchard Hill Road and Dutton Road.

We are using the Town of Dekalb's bucket truck on shared services and the men are doing an excellent job of cutting back roadsides.

We still have 1 truck at Champlain Peterbilt. All other trucks and equipment are up and running for now.

We should be receiving payments for the Pit Bridge project. One from FEMA anytime now for \$770,000.00 and in 3-4 weeks we should receive about \$130,000.00 from NYS. The money must stay in a separate account and can only be used on the Pit Bridge project.

I would like to retain Barton & Loguidice as our engineering firm for the remainder of the bridge project since they did the original design.

I received a quote on a new 2025 F-350 pickup truck with a plow and all safety lights. The price with everything included after \$3,300.00 off sticker price is \$65,237.50. I would like to get a Resolution to use that amount off our remaining CHIP balance of \$132,000.00.

I would like to thank the men for another safe and productive month.

Thank you,
Richard Meilleur
