

Highway Report

3/17/2026

We have had a busy month. We have blocked and split about 30 cords of firewood. We also have been cutting brush on Bellville and Lafaver Road.

Our wood boiler broke down, and we are heating the Town Barn with fuel oil and the waste oil burner. We are going through about 100 gallons of waste oil and 150 gallons of fuel a week. That is going to add up on fuel cost as we usually don't use any fuel oil.

I have got quotes on a new wood boiler from Steve Folsom and Burville Power Equipment. Burville Power Equipment does not install or service. Folsom can give a price to install and upgrade all parts and plumbing needed inside and out. Price for boiler alone is \$23,750.00. Folsom to get quotes on the rest of the parts and 4 hanging heater units by the next Board meeting.

We have had a couple truck breakdowns with 1 repair costing over \$8,500.00, for a complete rear suspension for the 2009 Paystar.
