

## Highway Report

5/26/2026

We have had a busy month. We took down several large roadside trees that were dying or dead. We got about 25 cords of firewood from them. We have also been doing a lot of ditch cleaning and all the dirt roads have been graded and are in pretty good shape for now.

We have been getting parts quotes for the sand screener repairs. It looks like about \$9,000.00 to get it all back into safe working order.

I have a list of paving projects for CHIPS. I had to use what we got last year for a reference as I haven't gotten any information from New York State.

CHIPS projects include:

1. 2.9 miles of hot mix asphalt paving
2. 4 miles of chipseal surface treatment
3. 1 mile of crushed stone (gravel rd)

For a total of 8 miles of road with CHIPS funds.

The total cost is \$485,556.50 out of \$555,673.45 available to cover asphalt costs being a lot higher than spring bid price. We should leave a good rollover amount. We will need a resolution to spend CHIPS funds and sign the spend agreement.

Thank you,  
Richard Meilleur  
Highway Superintendent
