Highway Report

10/20/2026

We have had another productive month. We have been screening sand and hope to be done by early next week. We are putting up extra sand as our pit will be closed for bridge repairs for all summer and most of the fall next year. We have also been fixing and replacing road signs. We have been cutting brush, boom mowing and are currently working on brush on Dutton Road.

The dump trucks have all been serviced and inspected. We will start to put snowplows on by the end of this week. Fuel prices are still high so we will not be running our trucks any more than needed. We still have to touch up our dirt roads before winter. I am hoping that we can have the new heat system completed by next week. The boiler and heaters are all installed with just some electrical and plumbing left to finish.

I would like to thank the men for another safe and productive month.

Thank you,
Richard Meilleur
Highway Superintendent
